

Laser Stitch Offers Tamper-Evident Solution! 909A

As food safety and security continue to be at the forefront of food supply concerns, more and more customers are looking for bag closure systems that include tamper-evident options.

To meet this customer need, Kwik Lok, the industry leader of bag closures, has teamed up with Matthews Marking Systems™ to develop new Laser Stitch Technology. The 909A provides a uniform “laser stitch” that indicates whether a bag has been opened. And bags do not tear when opened.

Once closed with a Kwik Lok closure, the bag is tamper-evident and re-closable for the consumer.

Bringing over 65 years of expertise to deliver advanced engineering and design that you can trust, Kwik Lok is committed to delivering new and innovative solutions. We work with our customers and industry partners to identify their unique needs - plus we provide the ongoing customer support you can rely on!

Kwik Lok®

909A Bag Closing Machine

BENEFITS

- Works on high-speed lines – Up to 65 bags per minute
- Minimal modifications to existing line needed
- Only 10” of line space required
- Synchronizes with your conveyor
- Bypass mode which allows you to run the line without laser
- No compressed air required
- Easy to install and use

TYPICAL APPLICATIONS

- Bakery Products

STANDARD FEATURES

- Easy to clean, durable aluminum and stainless-steel construction
- Serviceable with metric tools
- Emergency stop
- Pre-installed four line speed programs

INVISIBLE LASER RADIATION – AVOID EYE OR SKIN EXPOSURE TO DIRECT OR SCATTERED RADIATION – CLASS 4 LASER PRODUCT – 10.6µm 20W CW EN/IEC 60825-1 2014
