

865B Automatic Bag Closing Machine

IT CAN HANDLE ANYTHING YOU THROW AT IT.

“At Wada Farms Potatoes, we have experienced the reliability and durability of Kwik Lok’s closing solutions for over twenty-five years. Once again, Kwik Lok has created an unparalleled and efficient closing system that can stand up to the tough environment in our sheds.”

Kip Yeats
V.P. Fresh Operations Wada Farms

Apples. Potatoes. Pears. The new 865B reliably bags just about anything. With a more powerful motor, more safety features, lighter weight and an updated control system, the 865B is an even harder working workhorse than you're used to. Which is saying something.

Typical Applications

- Vertical Packages
- Horizontal Packages
- Produce in Wicketed Baggers
- Roll-Stock Baggers
- Ice
- Candy
- Tortillas

Specifications

Height 30"*
Width 25"*
Length 29.5"*

*Without printer and with standard printer reel.

865 Automatic Bag Closing Machine

MODELS

865B A is the “standard” 865 model which can be used for wicketed baggers, roll stock baggers, hand feed, and Kwik Lok 1083 take off conveyor.

865B B has an extended feed belt attachment, permitting the gear belt to extend 9 inches past the front of the machine. The Model B is required for use on baggers where the Model A cannot mount or where two operators are hand feeding the machine.

865B C has a bridge structure connecting the drive and idle belt sides of the machine. This allows the exit end of the closing head to be completely open and unobstructed. The Model C is designed to close bags that are too light or have large bag necks that will not clear from the standard Model A machine. The Model C can also be used for products that are contained and cannot drop down from the machine.

865B D combines the elements of the Model B and Model C. The Model D has an extended feed belt attachment along with a bridge structure connecting the drive

CLOSURES

Kwik Lok manufactures three styles of bag closures for use with the 865 Automatic Bag Closing Machine. Closures are produced in various plastic thicknesses enabling Kwik Lok to handle a wide range of package types, weights, and sizes. The closures can be printed with price, date, and/or code information by printers mounted on the 865 to permit in-line printing as the bags are being closed.
